

STORAGE CAPACITORS

PowerCap

Storage capacitors are standard equipment of every high-class car audio system. Because no equipment is better than it's power supply!

The **MUNDORF PowerCap** with a capacitance of 1.0 or 1.5 farad guarantees stabilized voltage directly at the amp. This basic requirement for clean music reproduction is as important at the signal source (head unit). The **MUNDORF HeadCap** guarantees that. Consequently optimized for highest power pulse currents, the **MUNDORF** storage capacitor range ensures extra power at the decisive moment. The result is a powerful and precise bass and a brilliant, open sound characteristics.

MUNDORF storage capacitors are available with the following types:

The PCC series without protection electronic

The installation of pcc1000/pcc1500 should be performed only by an expert. Subsequent works at the electrical wiring have to be carried out with increased caution as well (danger of short-circuit).

The SC series with integrated voltmeter and protection electronic

This feature makes possible a trouble-free installation and maintenance-free operations.

HeadCap

About the surprisingly often underestimated effect of the HEAD-CAPS, the specialist publications report: [...] the CD tuner can be upgraded inexpensively [...] the effect [...] becomes noticeable also at more favourable systems [...]. Thanks to ISO plugs, the installation is very simple. (Car&HiFi Magazin)

Product	[€]	Description
PCC68L	39.00	HeadCap 68000 µF
PCC68	59.00	HeadCap 68000 µF ISO plugs
PCC68i	79.00	HeadCap 68000 µF ISO plugs Charging Rate Limiter
SC68	99.00	HeadCap 68000 µF ISO plugs Protection Electronic
PCC1000	149.00	PowerCap 1.0 Farad
PCC1500	199.00	PowerCap 1.5 Farad
MCNV50	3.49	Mounting Clamp HeadCap Nylon vertical
MCNV75	7.99	Mounting Clamp PowerCap Nylon vertical
MCNL75	13.90	Mounting Clamp PowerCap Nylon horizontal

The Power Supplier.
